# GTCO CalComp AccuTab VI™

## Large Format High Accuracy Digitizer

### End of Life Announcement

In keeping with GTCO CalComp's commitment to continually evolve our products, streamline our portfolio and focus our resources on technologies with the highest customer value, we are announcing the End of Life (EOL) for the GTCO CalComp AccuTab VI digitizer.

Due to a reduction in demand for the AccuTab VI combined with the improved performance of the DrawingBoard VI, GTCO CalComp will provide units through February 28, 2009. At this time, we will provide the DrawingBoard VI as our High Accuracy, Premium digitizer. Last buy orders will be accepted on a first come first serve basis.

GTCO CalComp typically provides hardware maintenance, support and software drivers on End of Life products for a minimum of five (5) years depending on availability of parts and support software and systems.

### Recommended Replacement Product

The GTCO CalComp DrawingBoard VI high accuracy digitizer is the recommended replacement product for the GTCO CalComp AccuTab VI. The DrawingBoard VI provides +/-0.005 and +/-0.002 accuracy with the same active areas, native USB interface and system power, and increased proximity with a corded pointing device. The DrawingBoard VI digitizer is available in four sizes, 20x24, 24x36, 36x48 and 44x60 with a choice of corded or cordless pointing devices.

For more information on the GTCO CalComp DrawingBoard VI, including specifications and pricing, please contact your GTCO CalComp account manager or sales representative or visit our website at [www.gtccalcomp.com](http://www.gtccalcomp.com).
